PROFILE

Passionate and driven web developer with a solid foundation in HTML, CSS, JavaScript, Git, and GitHub, seeking opportunities to leverage technical skills and leadership potential to contribute effectively to a dynamic development team.

PROJECTS

Calculator Web Application

- Developed a calculator web application from scratch using HTML, CSS, and JavaScript.
- Implemented basic arithmetic operations including addition, subtraction, multiplication, and division.
- Designed and styled the user interface for optimal user experience and accessibility.
- Utilized JavaScript event handling to enable interactive functionality.

Quiz Website

- Created an engaging quiz website utilizing HTML, CSS, and JavaScript.
- Designed a user-friendly interface with intuitive navigation and visual feedback.
- Implemented multiple-choice questions with randomized options for dynamic user interaction.
- Incorporated JavaScript logic for scoring and result calculation.

Quote Generator

- Designed and developed a quote generator web application using HTML, CSS, and JavaScript.
- Curated a collection of inspiring quotes to display to users.
- Implemented JavaScript functions to generate random quotes dynamically.
- Styled the interface for readability and aesthetic appeal.

LEADERSHIP POTENTIAL

- Actively engaged in self-directed learning and exploration of advanced web development concepts.
- Demonstrated ability to work independently and collaborate effectively within a team environment.
